SIMATS ENGINEERING
ASSESSMENT TOOL 2

COURSE NAME: CSA07 COURSE CODE: Computer Networks

COURSE OUTCOME COVERED

CO1: Apply the functions of OSI layer in enabling reliable data transmission across networks. (BL2, BL3)

Assessment Tool Weightage: 30%

Annexure A

CONCEPT MAPPING

Code of Conduct:

I V. Humain (192524179) *(Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment.*
I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the student:

Criteria	Weightage (%)	Q1 10marks	Q2 10marks	Q3 10marks
Concept Identification	20%	1	2	2
Concept Mapping Structure	25%	2	2	2
Linking & Relationships	20%	1	1	1
Application & Analysis	20%	2	2	2
Explanation & Clarity	15%	1	1	1

Total Marks 22 **/30**

Signature of the Faculty

CONCEPT MAPPING QUESTIONS

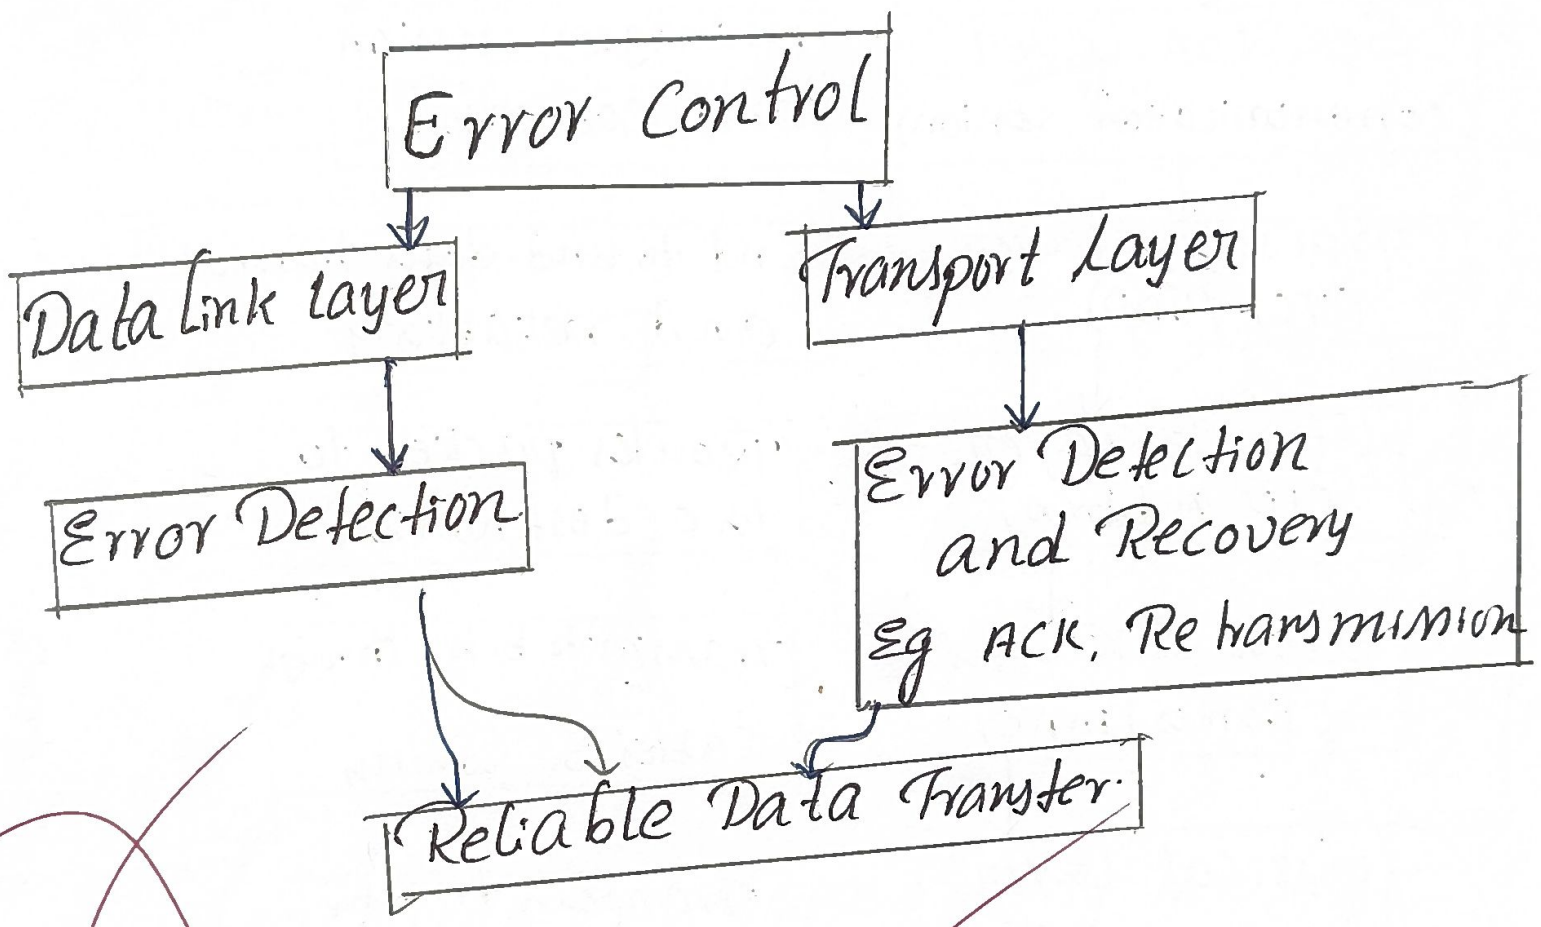

1. A partially completed concept map is given below:

Application → Presentation → _____ → Transport → Network → _____ → Physical.
Analyze the missing layers and explain how their functions are essential for reliable communication.

Name :- V. Hussain
Course :- Computer Networks
Course Code :- CSA 0709
Reg :- 192524179

10/10

4. Error Control in OSI layers

Explanation :-

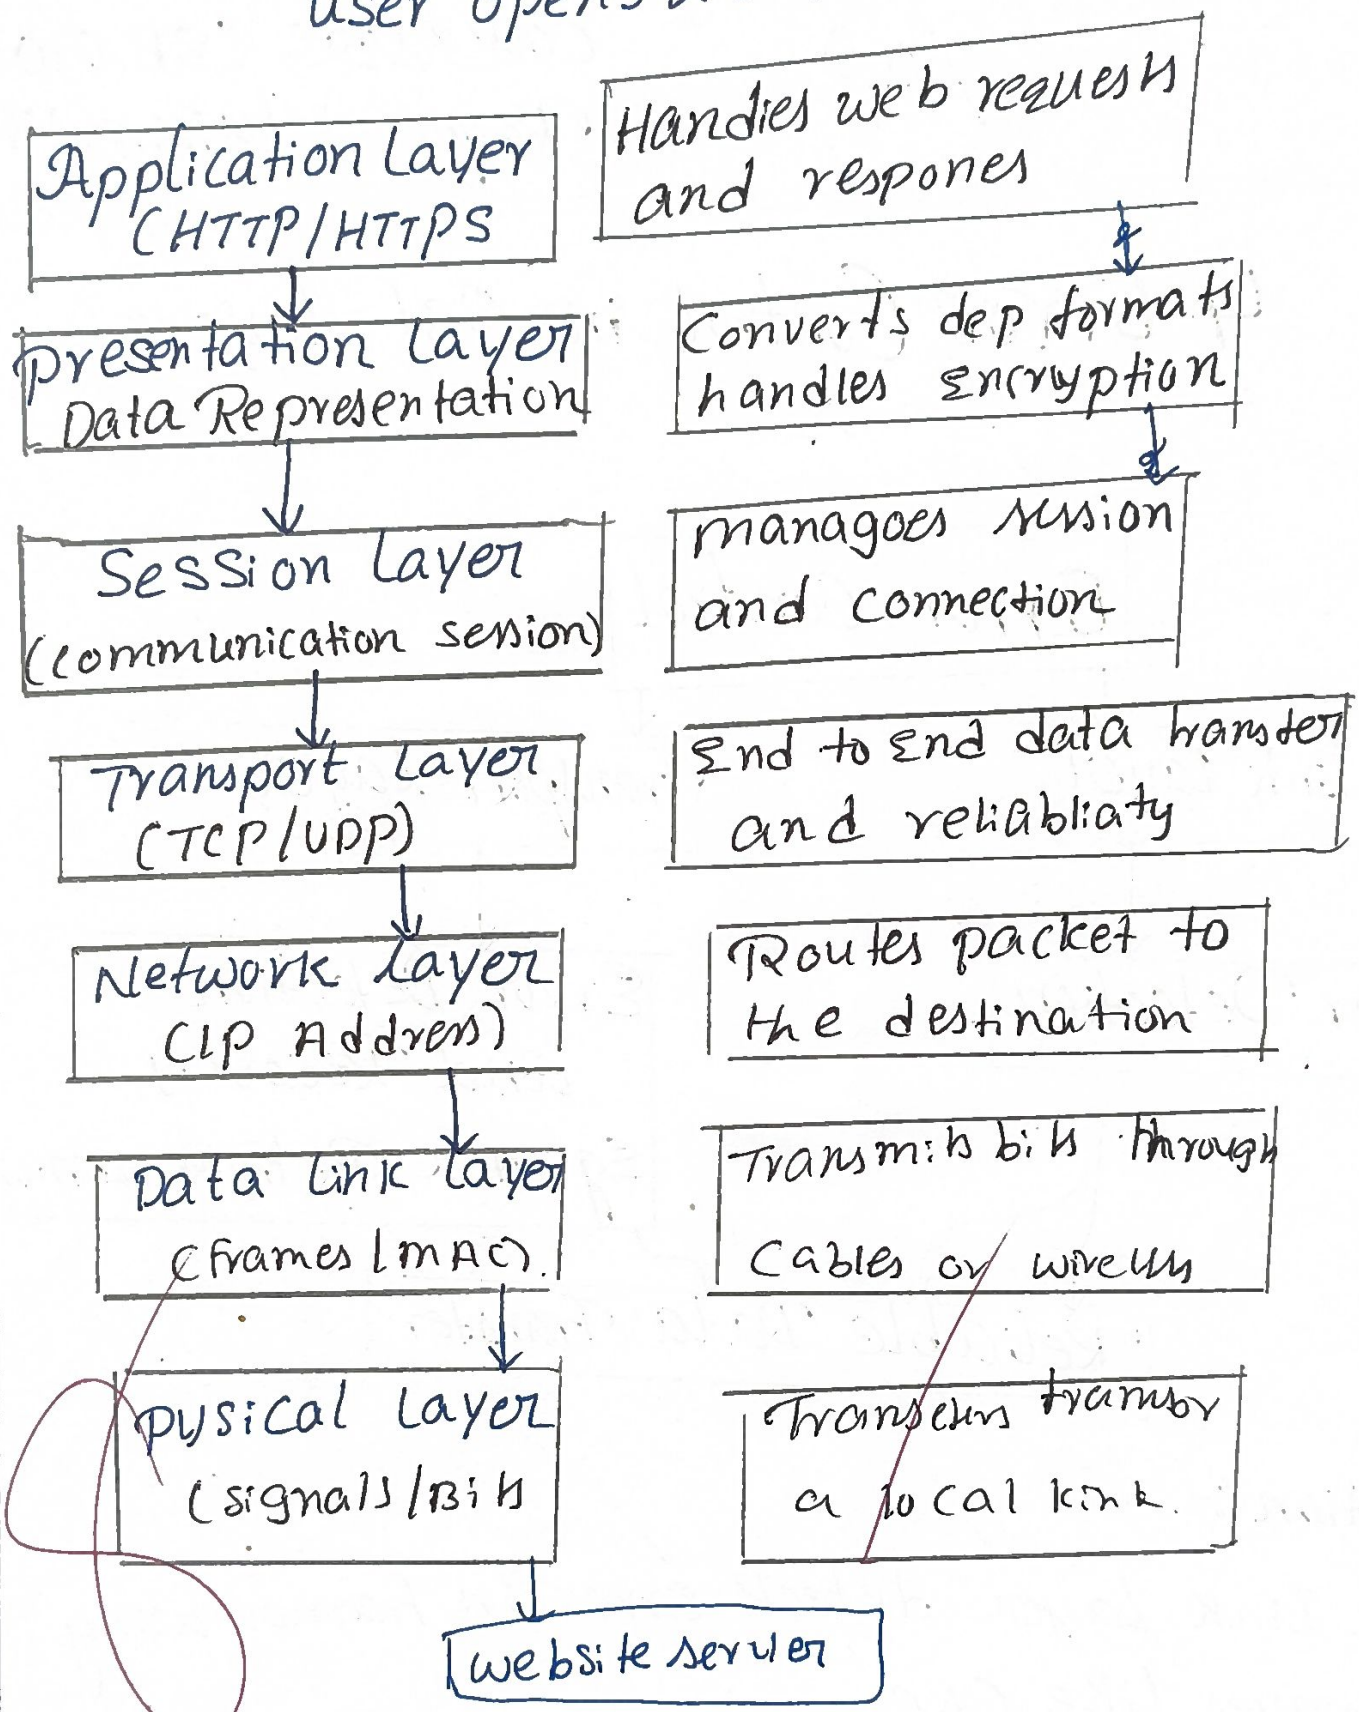

→ Data Link Layer. detects error in frames using techniques like CRC

→ Transport layer - users acknowledgements and retransmission to recover last or corrupted data

→ improves reliablity in data transmissions

5. Web Browing using OSI layers

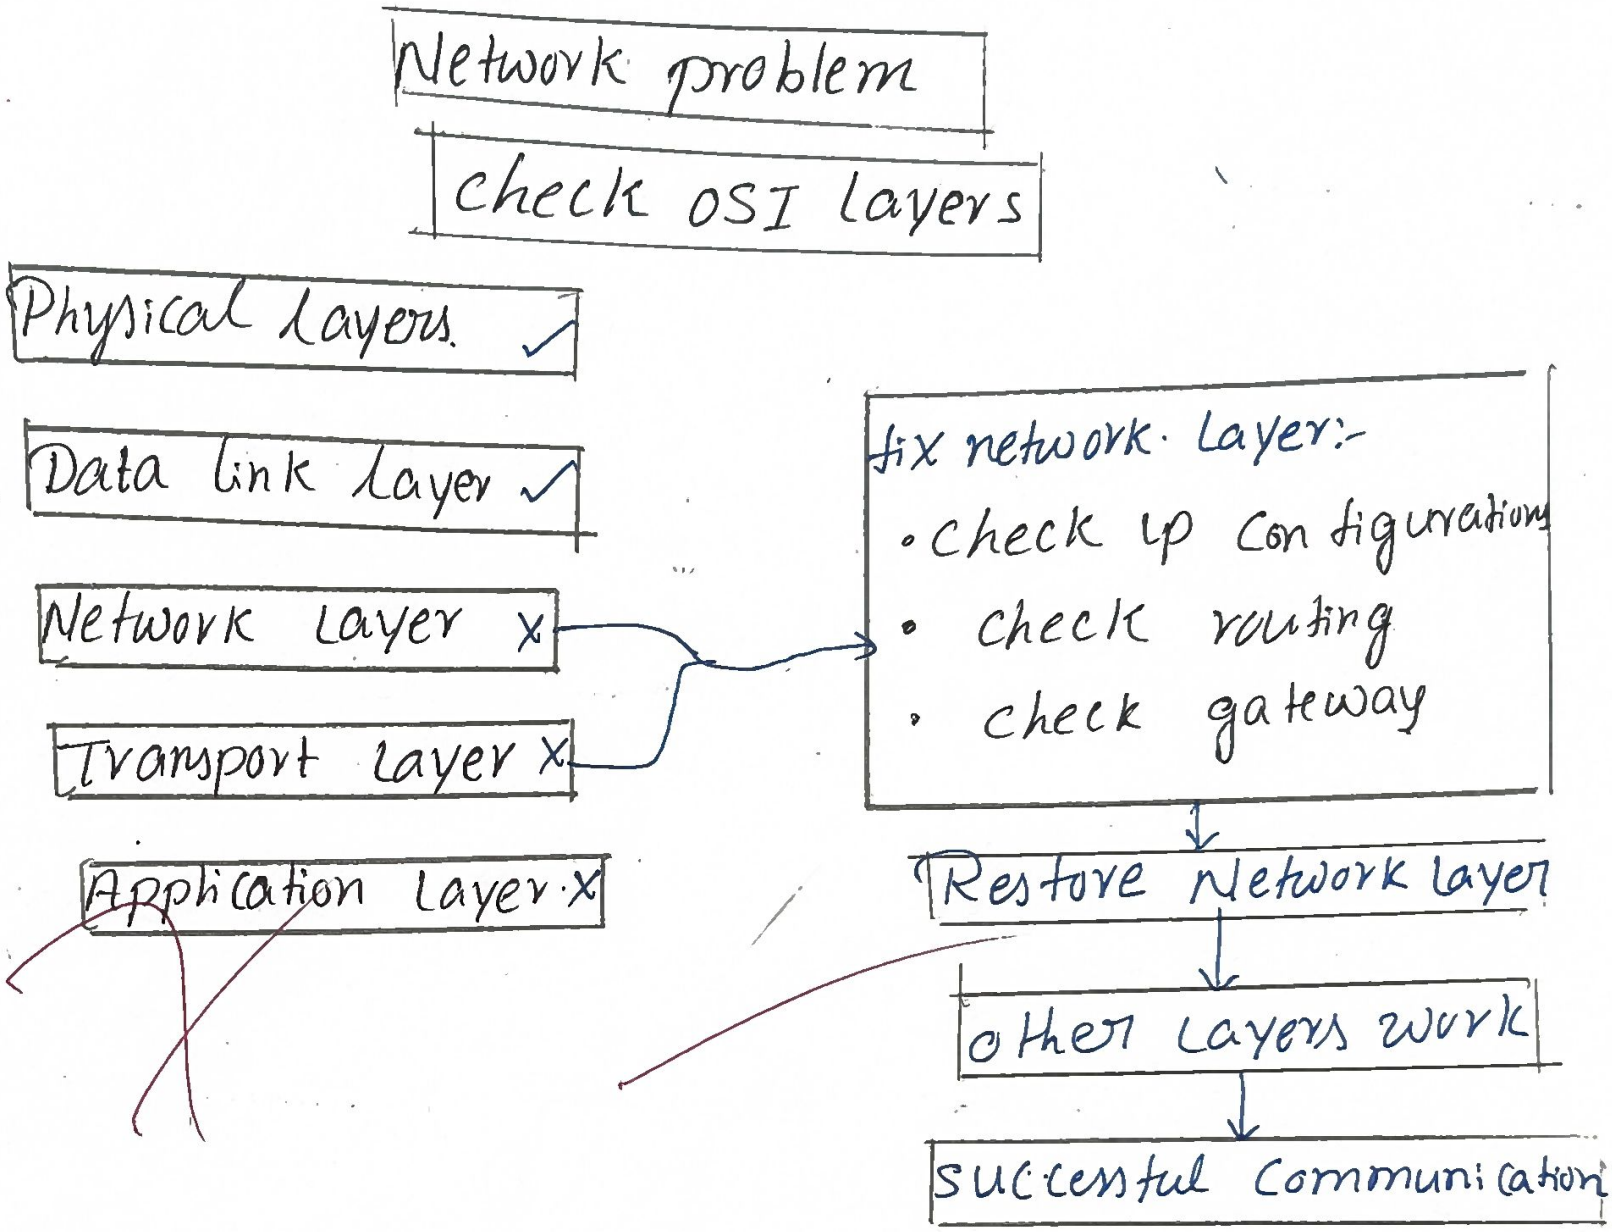

user opens a website

Analysis:-

failure in any layer breaks the communication proless and stops web browsing.

6. Network Trouble shooting

Analysis:-

The concept map helps identify the first layer that is not working. Troubleshooting should begin with ip configuration routing and gateway settings. once the Network layer is restored communication continues through the higher layers
